Nature Playscapes

Are you looking for a more natural environment for your playground?

If you dream of an outdoor space where children can experience the wonder of butterflies, flowers, and vine-covered trellises, then we will assist you in realizing your dream.

The cost will be surprisingly comparable to or less than the purchase of large play equipment.

Services we offer:

- o Creation of a Master Plan scaled drawing
- o Estimates of all costs (Excel format)
- o Supplier for products such as safety surfacing (wood fiber, rubber mulch, poured-in-place), sand tables and covers, vertical garden, loose parts, and zero-depth water fountains
- o Project Coordination for subcontracted services such as custom carpentry, landscaping, and plumbing
- o Training for teachers and staff to integrate the renovated outdoor space with your curriculum.

Custom Carpentry

Tree fort Gazebo Low bridge
 Drive-thru tricycle building
 Storage sheds for specific functions
 (sand tables, gardening, classrooms)

Sand & Water Play

Large terraced areas
 Dry creek bed
 Trench/piping/drainage
